### TOPICS OF THE DAY.

THE Nevada cattlemen are improving their business by providing for irrigation and by cultivating tame-fodder plants. One company has a thousand acres of alfalfa growing, and has a water basin in Elk County holding over eight million gallons of water.

THE Treasury building has cost altogether over \$7,000,000, and it is considered by the artists as one of the finest buildings in Washington. It is the largest department under the government, and its total salary list amounts to about \$3,000,000 a year.

A MEMBER of Congress is reported to have said to some of his constituents who were sight-seeing in Washington: "Go first to the Smithsonian Institution, where you will see all that God ever made; go thence to the Patent office, where you will see all that man ever

At the earliest celebration of the glorious Fourth in Albany, N. Y., in 1787, the common council resolved: "That the Corporation will, after the firing of the Cannon, proceed in Procession to the City Tavern." This primitive idea of celebrating hasn't wholly died out, though it is not quite so frankly pro-

ONE of the newly-invented detective cameras exhibited at the American Photographers' convention in St. Louis was the "satchel camera." It looks exactly like an alligator skin hand-bag, is carried by a shoulder strap at the side of the operator, and pictures are taken without attracting attention and without focussing the object.

THE scheme for a railroad in Asia has been revived. In a report upon it, Major Powell, of the Geographical Survey, says that the distance from Montana to Behring Sea is about 2,800 miles, and that a railroad could be built all the way without meeting any greater difficulties than have already been surmounted in existing lines.

RHODE ISLAND has passed under a stringent prohibitory law. The citizens generally prepared for it by filling up all their available demijohns and bottles, and the siege promises to be a desperate one. Hereafter no unlucky wight can get any thing to drink without a physician's prescription. The hotels in Providence and Newport threaten to

THE French Government has presented a gold medal to M. General Goode, of the Department of Justice.
HOUSE.—The reference of the President's veto messages on pension bills to the Invalid Pension Committee occupied most of the day. A number of lively speeches were made by members interested in certain cases. Reports on two vetoed pension bills were presented and ordered printed. Unanimous consent was asked to take up and pass the Blair pension bill, but the Democrats objected. The general deficiency bill was taken up and the amendment granting one month's extra pay to Senate and House employes agreed to. The House at 5 p. m. took a recess until 8 p. m. for pension bills. FIVE New York belles having discovered a big patch of daisies in a farmer's lot near where they were summering, asked permission to pick a few. The field for twenty-five cents, and they cleaned out the patch, not once sus pecting that they were helping to keep down the most noxious weed that pesters the honest farmer.

physician, has not allowed the Chancellor for some time past to drink anythin, during meals. Now he goes step further, and wishes the Prince to shut off on beer-drinking altogether. Bismarck will obey, as he found out on two or three occasions when he remonstrated with Dr. Schwiniger that the latter will stand no trifling.

Persons contemplating presidential careers should begin appropriate land says that after shaking hands with 5,000 people in one day, her left arm pained her cruelly, while the right, which had done all the work, did not suffer at all. This was also General Grant's experience. The future presidential training school should include toughening exercises for both arms.

Man is not the only animal that commits suicide. Herrings and other fish have sought death by rushing ashore in myriads; regiments of ants, by deliberately marching into streams; swarms of rats, by migrating into the face of their deadly foes, and even butterflies, by flying in immense clouds straight out to sea. It would be interesting to learn the causes of the apparent wholesale and deliberate self-destruction. Is the act a purely conscious one, or are the creatures victims of disease-mental or physical?

In Naples there is a regular newspaper reading craze, and even the beggare rather around some fortunate posse of a daily paper as he reads aloud in the street. But the people soon get tired of every day some paper dies and another es its place. One of the most certain ways of killing a newspaper in Italy, by the way, is to fill it with news. WASHINGTON, July 5.—SENATE.—No session.

House.—After a few unimportant resolutions were offered and referred, the House went into committee of the whole on the general deficiency appropriation bill. A long, and at times aerimonious, discussion arose over an amendment offered by Mr. Cannon (ill.), appropriating \$22,000 to refund taxes illegally collected from certain railroad companies on account of alien bond and stockholders. The amendment was adopted. The clause ratifying and confirming the readjustments of the salaries of postmasters heretofore made by the Postmaster General pursuant to the act of the 3d of March, 1893, was ruled out on a point of order, and an amendment offered by Mr. Burnes (Mo.), striking out the entire appropriation for readjustments (\$362,334), was adopted. After concluding the consideration of all but ten pages of the bill, the committee rose and the House at 5 p. m. adjourned.

WASHINGTON, July 6.—SENATE.—A large number of petitions were; presented from the Knights of Labor praying for the forfeifure of railroad land grants. A bill was passed appropriating \$75,00 for the Cherokee freedmen, this being their proportion of certain proceeds of lands purchased from the Cherokee Nation. The river and harbor bill was taken up. At 5:40 p.m. the Senste went into executive session, and soon afterward adjourned.

Home Rule in Cuba. New York, July 6.—Following in the footsteps of the Irish people, the Cubans have been trying to obtain home rule for the Island of Cuba from Spain. The Spanish ministry have had the matter under considerat on, and a few days ago concluded that Cuba must still continue under the Spanish rule. The rejection of the home rule proposition was to have been the signal for another uprising of Cubans, and great preparations have been made for car-rying it into effect.

Election Riot at Londonderry. DUBLIE, July 6 .- A riot followed the fire nouncement of the result of the content between Mr. Lewis and Justin McCarthy, at Londonderry, to-day. The cause of the disturbance was the discovery, after the election had been declared in favor of Mr. Lewis, of a ballot-box the contents of which had not been counted. A recount followed, which almost made the election a tie, giving it to Mr. Lewis by a majority of only three. The police interfered and attacked the Loyalists, who had assembled in front of the hotel where Mr Lewis was staying, and were making a demonstration in celebration of his victory. A large number of persons were injured.

Official Report of the Seizure of th Fishing Schooner City Point.

The Captain of the Terror Will Take American Vessel Whenever He Can Find It.

PORTLAND, Mr., July 7.—Captain Keene' official report of the seizure of the schoone City Point by the cruiser Terror was re ceived by the owners to-day. It appears that the whole cause of the trouble was the at Shelburne on Wednesday at 4 p. m., five miles below the town, as there was no suitable place to fill the casks at the town. I waited until about six o'clock on ac-count of the tide and then proceeded to fill the water-casks. Two of the men in the mean time went home, which was about one mile farther up the harbor, taking their old clothes to get them washed and mended. That was against my orand mended. That was against my orders, I having previously forbidden the
crew taking a thing out of the vessel in
any Dominion ports. Thursday afternoon,
having finished repairs, I went on shore
to clear, but a bill of clearance was reused by the collector, he saying that I had violated the law, and that they would have to report to the department at Ottawa. This same cutter had two men aboard the Craig at Liverpool, and the cutter's cap tain says that after he allowed the captain of the Craig to put his sick son ashore he stole another man after that and went to sea. The captain of the Terror said that he would take the Craig whenever he could

St. Louis Anarchists Dismissed. Br. Louis Anarchists Dismissed.

Br. Louis, July 7.—A motion to dismiss the case of the Anarchists, charged with unlawful assembly and endorsing the action of their Chicago brethren during the Haymarket riot, was argued this afternoon in the court of criminal correction. Judge Noonan sustained the motion to dismiss, holding that there was nothing to show that the alliend unlawful resolutions as offered the alleged unlawful resolutions as offered were adopted. If the resolutions were only offered and not adopted, the sentiments ex-pressed therein were merely opinions, and every one was entitled to his opinion in this country. This Government was strong enough, at any rate, and there was no use in inspiring timidity by paying attention to the vaporings of a few men who held peculiar views on social and political questions. It was time enough to prosec when they were guilty of some overt act.

Maxwell Refused a New Trial. St. Louis, July 7.—Judge Van Wagoner, of the criminal court, to-day overruled the motion made recently by Maxwell's at-torneys for a new trial. A WITHERING SIMOON.

The Dakotians Thought the World Was Coming to an End.

St. Paul, July 8.—People in Dakota thought the world was coming to an end the day before yesterday. The wind was like a simoon. Birds, horses and cattle apparently became crany with fright, anticipating some catastrophy. Early in the morning people were awakened by a roaring blast as hot as if from a furnace. Fearing a cyclone they took refuge in celegating the state of the st Fearing a cyclone they took refuge in cel-lars. The hot wind lasted an hour. The temperature was 120 degrees.
